

RMA BLENDING**TYPICAL PROPERTIES**

Appearance (Visual Observation)	Free Flowing White Powder
K-Value	61.3 ~ 66.0
Polymerization Degree	930 ± 100
Volatiles (% maximum)	0.35
Apparent Bulk Density (g/cc)	0.50 ~ 0.70
Particle Size (mastersizer)µm	30
Particle Size	
Through 60 mesh ,%	100
Through 270 mesh ,%	98

The data above were obtained on samples of the material under laboratory conditions. To the best of RMA's knowledge, these data are within the accuracy and precision of the respective tests. Because of testing and sampling variability, we cannot guarantee that other laboratories will obtain the same results and NO WARRANTY IS EXPRESSED OR IMPLIED
